

JAW CRUSHER JC6

- Feed size : <40mm
- Final fineness: <0.5mm
- Speed : 500-1000rpm

JC6 and JC5 Jaw Crusher share a common application field and operational principle. Both models offer the advantage of zero-point correction to offset wear. However, JC6 is specifically designed for desktop use, distinguishing it from JC5. JC6 is characterized by its compact design, user-friendly operation, and the ability to achieve a high final sample fineness (d90 < 0.5 mm).

APPLICATIONS

Jaw Crusher JC6

- **Mining and metallurgical sectors:** for materials such as niobium and titanium alloys, vanadium iron, chrome vanadium, tungsten carbide, ores, coal, slag, and coke.
- **Chemical industry:** suitable for processing a wide array of raw materials used in chemical production.
- **Geological and mineralogical applications:** used for crushing rocks, granite, basalt, barite, silicate, and similar geological materials.
- **Ceramic industry:** applicable for materials like talc, sintered clay, sintering ceramics, and electric ceramics.
- **Building materials sector:** ideal for processing materials like bauxite, slag bricks, quartz, and cement.

FEATURES

- High processing capacity, achieving significant size reduction.
- Zero point adjustment to compensate for wear over time.

- Anti-splash designed hopper to prevent splashing.
- Easily cleaned crushing chamber for convenience.
- Outstanding performance and achieving a high level of final fineness ($d_{90} < 0.5 \text{ mm}$).
- Jaw plates available in various materials including manganese steel, stainless steel, tungsten carbide, zirconium oxide, heavy-metal-free steel, and industrial plastic.

TECHNICAL SPECIFICATIONS

Feed size	<40mm
Final fineness	<0.5mm
Speed	500-1000rpm
Collector capacity	3L
Jaw plate width	59.5mm
Gap setting	0~11mm
Zero point adjustment	Yes
Rated power	1.1KW
Power supply	220V,50Hz/60Hz (110V Also available upon request)
Instrument size(W*D*H)	450×630×490mm
Package size(W*D*H)	785×900×780mm
Net Weight	93kg
