

COLOR / PAINT / COATING TEST EQUIPMENT

Ensuring visual consistency and material quality is paramount in industries ranging from automotive and textiles to food processing and packaging. Torontech's Color / Paint / Coating Test Equipment suite offers precise instrumentation to measure critical optical properties including color difference, gloss, haze, and spectral reflectance.

Our technology empowers Quality Assurance (QA) teams to eliminate subjective errors in visual inspection. Whether you require a handheld device for on-site checks or a high-end benchtop system for complex laboratory analysis, our instruments adhere to international standards (CIE, ISO, ASTM) to guarantee that your product's appearance matches its specifications perfectly.
