

CUTTING MILLS

Torontech's versatile range of Cutting Mills is engineered to master the challenges of sample preparation for materials that are difficult to process with standard crushers. Processing soft, fibrous, elastic, or heterogeneous samples—such as plastics, biomass, secondary fuels, and biological tissue—requires a cutting action that minimizes thermal degradation while ensuring perfect homogenization.

Our instruments deliver high torque and variable speeds to achieve the required final fineness for analytical testing. From food safety laboratories to polymer research facilities, Torontech provides the reliability needed for accurate particle size analysis and quality control.

Torontech Inc.

251 Consumers Road, Suite 1200
Toronto, Ontario, M2J 4R3, Canada
