

HANDHELD PRECIOUS METAL ANALYZER TRUEX FAMILY

The Handheld Precious Metal Analyzer TrueX Family is a favorite in the precious metal industry for its portability, rapid analysis, and non-destructive testing (NDT) capabilities. With simple sample handling, it accurately measures the purity and composition of precious metals like gold, silver, and platinum in just seconds. It finds extensive application in on-site testing for identifying jewelry, recycling gold, and ensuring quality control.

Introducing the Handheld Precious Metal Analyzer TrueX Family, a cutting-edge solution revolutionizing precious metal analysis. With its remarkable portability, this analyzer enable recyclers to perform on-site assessments, eliminating the need to send samples to labs. This streamlines operations, saving time and transportation costs while enhancing efficiency. By delivering precise composition analyses, the TrueX Family enables swift evaluation of material worth, refining sorting and pricing strategies, and enhancing market competitiveness.

1.5KG

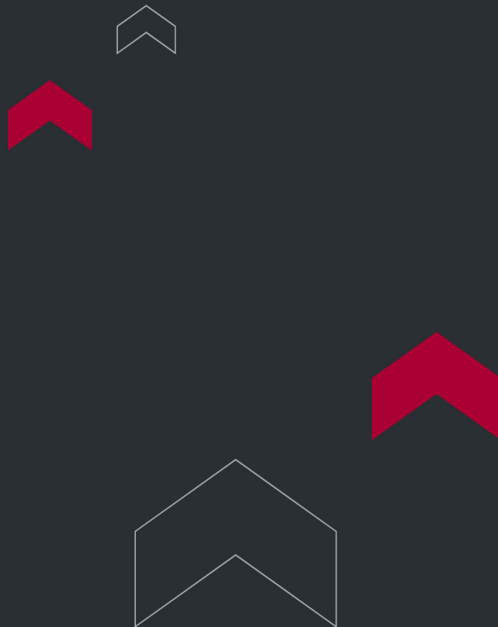

Easy to carry, realizing on-site/outdoor analysis easily

One-button operation

Simple operation, clear and intuitive display

High accuracy

Accuracy up to 0.01% (9999 gold)
