RECIRCULATING COOLANT TANK FOR ABRASIVE CUTTERS - TORONCUT™ CT-SERIES

Recirculating Coolant Tank for Abrasive Cutters – ToronCut™ CT-Series designed for compatibility with multiple cutter brands, this cooling system is an adaptable solution that promotes cleaner, more efficient cutting operations.

APPLICATIONS

The ToronCut™ CT-Series Recirculating Coolant Tank is an essential support system for any abrasive cutter, designed to optimize the sectioning process. By delivering a continuous supply of clean, filtered coolant, it effectively prevents thermal damage, minimizes sample deformation, and significantly extends the life of the cutting wheel. This ensures the production of high-quality, pristine cut surfaces ready for subsequent analysis.

This system is a critical component for maintaining cut quality and efficiency in:

- **Metallurgical Sample Preparation:** For producing clean, burn-free cross-sections of metals and alloys, which is an absolute prerequisite for accurate microstructural examination, hardness testing, and weld inspection.
- **Manufacturing Quality Control:** To section production parts such as castings, forgings, and heat-treated components for routine inspection to verify process integrity and check for internal defects without introducing cutting artifacts.
- **Failure Analysis:** In forensic engineering to carefully section failed components, preserving the integrity of fracture surfaces and the surrounding microstructure, which is crucial for accurately determining the root cause of failure.
- **Materials Research & Development:** For preparing a wide variety of materials, including composites, ceramics, and advanced alloys, ensuring that the cut surface is representative of the bulk material for subsequent characterization and testing.

Recirculating Coolant Tank for Abrasive Cutters – ToronCut CT-Series

Recirculating Coolant Tank for Abrasive Cutters – ToronCut CT-Series

FEATURES

- **Anti-Rust Plastic Tank:** Durable, corrosion-resistant construction for long-lasting performance across various cutters.
- **Mobile Tank with Wheels:** Easily transported to accommodate different work setups.
- **Drain Valve for Easy Water Changes:** Simplifies maintenance and ensures efficient operation.
- **Multi-Chamber Filtration:** Provides superior filtration for cleaner coolant circulation, reducing contamination risks.
- **Optional Strong Magnetic Filtration:** Enhances particle capture, ideal for metalworking applications.
