

UNIVERSAL TESTING MACHINES - TENSILE TESTER

Universal Testing Machines - Tensile Tester

A universal testing machine, or universal tensile testing machine, measures the strength and durability of materials. It applies force to test tension, compression, bending, or shear—helping you find out how materials perform under stress.

Torontech offers a reliable solution for quality control, product development, and compliance testing.

Built to Test Any Material

Use one machine to test:

- Metals
- Plastics
- Rubber
- Composites
- Textiles

What Makes It a Smart Choice

- **Fast and Accurate Results**
Know exactly how strong your material is, every time.
- **Wide Load Capacity**
Test samples from 10 kN up to 3000 kN.
- **User-Friendly Software**
Set up, run, and export test results with just a few clicks.
- **Reliable Frame Structure**
Built for stable, repeatable measurements over years of use.
- **Low Maintenance**
Fewer breakdowns mean lower costs and less downtime.

- **International Standards Ready**

Fully meets ASTM, ISO, and other testing protocols.

- **Designed to Save Time and Cost**

Torontech's universal tensile testing machine combines performance and value. It helps manufacturers reduce product failure, shorten testing time, and improve confidence in every batch.

Designed to Save Time and Cost
