

MEDICAL LABORATORY ANALYZERS

Torontech proudly offers a next-generation range of Medical Laboratory Analyzers engineered to deliver fast, accurate, and reliable diagnostic results. Our advanced systems are ideal for clinical laboratories, hospitals, diagnostic centers, research institutions, and university laboratories.

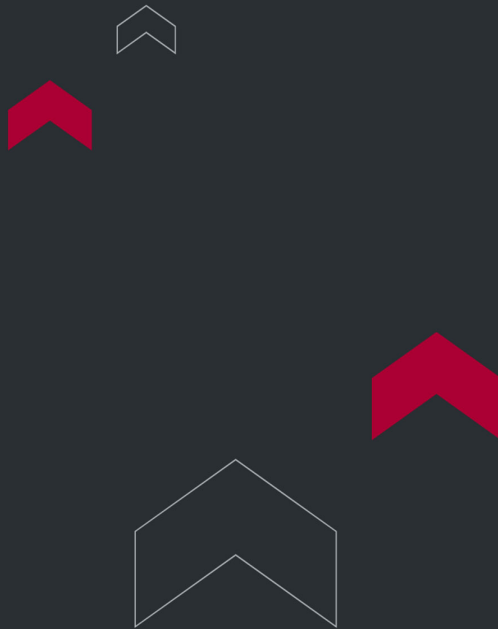

The product lineup features high-performance Real-Time PCR Systems (qPCR Quantitative Thermal Cyclers), Microfluidic Immunoassay Analyzers, Microfluidic Biochemistry Analyzers, Fluorescent Immunoassay Analyzers, and Urine Analyzers, all designed to meet the evolving needs of modern medical and scientific environments.

At the forefront of molecular diagnostics, our qPCR systems offer rapid, precise, and quantitative detection of nucleic acids, supporting critical applications such as infectious disease testing, gene expression analysis, and clinical research. Our microfluidic technologies enable compact, high-throughput solutions for immunoassay and biochemical analysis with minimal sample and reagent consumption's ideal for point-of-care and decentralized laboratory settings.

Our Medical Laboratory Analyzer Product Range Includes:

1. [Real-Time PCR Systems \(qPCR Quantitative Thermal Cyclers\)](#) - advanced thermal cyclers for quantitative molecular diagnostics and life science research.
2. [Microfluidic Immunoassay Analyzers](#) - rapid, small-footprint systems for on-chip detection of proteins, hormones, and disease markers.
3. [Microfluidic Biochemistry Analyzers](#) - compact and automated solutions for high-precision biochemical testing of clinical fluids.
4. [Fluorescent Immunoassay Analyzers](#) - highly sensitive analyzers for detection of tumor markers, hormones, and infectious diseases.
5. [Urine Analyzers](#) - automated urinalysis systems to support routine health screening and kidney function assessment.

Torontech's medical analyzers combine innovative design, scalability, and regulatory compliance, empowering laboratories to increase efficiency, accuracy, and throughput. Whether you're working in diagnostics or discovery, our systems are built to meet the demands of today's clinical and biomedical laboratories.
